

ZICEN YIN (Alice)

Interaction Designer · UI / UX · Digital Media

Sydney, NSW · 502874781s@gmail.com · [Portfolio](#) · [Showreel](#)

Student visa (subclass 500), valid to September 2028 · Available up to 48 hours per fortnight in semester, full-time during university breaks

PROFILE

Interaction designer and creative technologist with a BFA in Sci-Tech Art from the Central Academy of Fine Arts (Beijing), now studying a Master of Interaction Design and Electronic Arts at the University of Sydney. Six self-directed projects across UX research, service design, product concepts, wearables and interactive installation — taken end to end from user research and Figma wireframes through to working hardware and front-end prototypes. Award-winning graduation installation featured by CGTN; self-produced digital media work has reached audiences in the millions.

SKILLS

UI / UX	Figma — wireframing, user flows, design systems, interactive prototypes. User research, personas, pain-point analysis, journey mapping, service design, low- and high-fidelity prototyping, usability review.
Visual & layout	Adobe Photoshop, Illustrator. Typography, editorial and multi-page layout, logo and identity design, digital content production, exhibition and campaign graphics.
Web & front-end	HTML, CSS, JavaScript. AI-assisted prototyping (“Vibe Coding”) for live, responsive browser demos.
Creative tech	Arduino, ESP32, TouchDesigner, Python, Unreal Engine. Responsive sensor systems (pulse, stretch, bone-conduction audio), machine vision (OpenCV, Keras, CNN), AR.
3D & motion	Blender, Maya, ZBrush — modelling, rendering, spatial visualisation. Video editing and documentation.
Digital media	Content strategy and production for Douyin, Bilibili and Xiaohongshu. Video documentation, audience engagement, media relations.
Coordination	Project scheduling, documentation and records, materials procurement, contractor and logistics liaison, Microsoft Word and Excel.

SELECTED WORK

Tears before Words Interactive installation · Graduation capstone, CAFA Mar – Jun 2026

Lead artist, producer and technical director — solo

- Designed and delivered a multi-sensory interactive installation on emotional resonance and collective healing for young people from boarding-school backgrounds.
- Built the interaction system with custom embedded code, microcontrollers and responsive sensors, turning internal emotional narrative into a real-time physical interface.
- Planned the physical build through digital modelling and spatial blueprinting, resolving space, electronics, interaction flow and visitor experience before fabrication.
- Ran the whole project: layout, budget, materials procurement, fabrication planning, on-site assembly with logistics teams, and daily audience facilitation and media interviews across the public showing.
- **Awarded** CAFA Outstanding Graduation Work; **shortlisted** for the final review stage of the 3rd National Exhibition of Fine Arts for University Students; **featured by CGTN** in its CAFA 2026 Graduation Exhibition coverage.

UX, PRODUCT & SERVICE DESIGN

Reground UX · Service · Product design 2025

UX, service design, 3D, hardware concept

- Mobile app and plush companion robot that guide people out of dissociative episodes, designed for sustained daily re-use rather than one-off crisis use — the whole value depends on people coming back to it.
- Produced personas, pain-point analysis, user flows, low-fidelity wireframes and the onboarding and sign-in flow in Figma.
- Built a live browser prototype in HTML, CSS and JavaScript, with supporting 3D and visual assets in Blender and Photoshop.

EmpaLens Product · Service · UX · Wearables 2025

Product design, UX, ML integration, industrial design

- Smart glasses and a companion badge that translate real-time facial emotion for the partners of autistic people — designed for the carer, a user group products rarely address.
- Integrated a CNN facial-emotion model (FER-2013, OpenCV, Keras) into an AR display concept; designed the interface and the surrounding service model in Figma.

INTERACTIVE INSTALLATION & CREATIVE TECHNOLOGY

EXSTASIS Interactive installation · Bio-art · Art therapy 2024

Concept, interaction and fabrication — solo

- Visitors cultivate bacteria from their own hands; machine vision reads the growth and generates a personal guardian spirit in response. Arduino, Python, TouchDesigner, machine vision.
- Framed as art therapy: shamanism’s oldest idea — that the self is decentralised and kin to the living world — rebuilt as a machine visitors can touch.

PainShift VR · Biofeedback · Service design

2024

Concept, interaction, hardware, Unreal Engine build

- VR meditation that turns breath and pulse into generative visuals, framing chronic pain as manageable without medication. Unreal Engine build, Arduino with pulse and stretch sensors, TouchDesigner.
- Designed around the therapeutic goal of a patient who reaches for the headset rather than the medication bottle — which made willingness to return the design problem, not immersion.

Through Their Eyes Interactive installation · Critical design

2025

Concept, research and installation design — solo

- Installation on covert filming: concealed pinhole cameras record visitors, then a live AI pipeline generates and prints fabricated accusations about them in real time.
- A critical-design argument that you cannot reason someone into empathy, only stage it: the visitor becomes the subject of the surveillance they came to look at.

FREELANCE & VOLUNTEER EXPERIENCE

Freelance Graphic Design Independent · private clients

- Logo design commissions for private clients — brief, concept iterations and final delivery files.

Editorial & Social Layout Design Student society, CAFA · volunteer

- Designed article layouts and cover graphics for the society’s WeChat publication, working to the society’s publishing schedule.

DIGITAL MEDIA & AUDIENCE ENGAGEMENT

Independent — self-produced documentation and campaigns for own work

- **Tears before Words** reached 50M+ total views and 2M+ engagements across platforms during the 2026 graduation season.
- Graduation ceremony video campaign ranked **#1 on Douyin’s hot list** with 2.2M+ organic likes, and received platform traffic and cash incentives.
- Self-produced making-of documentary on the technical build: **640K+ organic likes**. Homepage feature on Bilibili; traffic support and product sponsorship from Xiaohongshu (RED).
- Independent curator coverage of the installation accumulated **2.49M+ likes** across platforms.

EDUCATION

The University of Sydney Sydney, Australia

2026 – 2028 (expected)

Master of Interaction Design and Electronic Arts (IDEA)

Central Academy of Fine Arts (CAFA) Beijing, China

2022 – 2026

Bachelor of Fine Arts — Experimental Art and Sci-Tech Art, Sci-Tech Art Studio

AWARDS & RECOGNITION

2026

Outstanding Graduation Work Award — Central Academy of Fine Arts (institutional)

2026

Shortlisted, final review stage — 3rd National Exhibition of Fine Arts for University Students (national)

2026

Featured by CGTN — CAFA 2026 Graduation Exhibition broadcast coverage
